

四川农业大学

Sichuan Agricultural University

课程成绩单说明

一、课程学分

学分是用于计算学生学习量的基本单位，学校以学生获得的总学分计算学生的学习量。课程学分主要依据课程类别及学时数确定，课堂教学（含实验）一般以16~18学时为1学分，实践教学环节（教学实习、顶岗实习等）一般以20或25学时为1学分。

二、课程成绩绩点与加权平均成绩

1. 课程考核成绩实行百分制，60分及以上表示成绩合格并取得该门课程学分。课程成绩绩点按以下公式计算：

$$\text{课程成绩绩点} = (\text{课程成绩} - 60) / 10 + 1$$

成绩与成绩绩点的对应关系如下：

课程成绩绩点	5.0 ~ 4.0	3.9 ~ 3.0	2.9 ~ 2.0	1.9 ~ 1.0	0
百分制成绩	100 ~ 90	89 ~ 80	79 ~ 70	69 ~ 60	<60

2. 平均成绩绩点反映学生学习能力和学习质量。平均成绩绩点按以下公式计算：

$$\text{平均成绩绩点} = \sum (\text{课程成绩绩点} \times \text{课程学分}) \div \sum \text{课程学分}$$

3. 加权平均成绩 = $\sum (\text{课程成绩} \times \text{课程学分}) \div \sum \text{课程学分}$

Notes on the Undergraduate Transcript of Sichuan Agricultural University

1. Course credits

Credit is the basic unit that gives weight to the value, level or time requirements of an academic course. The total credits obtained by a student reflect his academic achievements. Every 16~18 class hours (experiments included) is marked as one credit. As to practicums (practice curriculum, post practice and so on), 20 or 25 class hours is recorded as one credit.

2. Course Grade-point Average (GPA) and Weighted Average Mark (WAM)

(1) For courses with percentile marks, grade-point is calculated in the following formula:

$$GP = (\text{Course score} - 60) / 10 + 1$$

A correlation between the scores in the corresponding hundred-mark system and the course GP is shown in the following table:

Course GP	5.0 ~ 4.0	3.9 ~ 3.0	2.9 ~ 2.0	1.9 ~ 1.0	0
Corresponding hundred-mark system	100 ~ 90	89 ~ 80	79 ~ 70	69 ~ 60	<60

(1) As a main index to distinguish students' achievements, GPA is calculated in the following formula:

$$GPA = \sum (\text{Course credits} \times \text{Course GPA}) \div \sum \text{Course credits}$$

(2) WAM = $\sum (\text{Course percentile marks} \times \text{Course GPA}) \div \sum \text{Course credits}$
