

Request for Non-Author Proxy Presenter

Dear ICASSP 2026 Organizing Committee,

Our paper 7252 ("**TOWARD ROBUST SPATIAL MULTI-OMICS INTEGRATION: SPATIAL MULTI-OMICS INTEGRATION VIA ALIGNMENT AND SCHEDULED DIFFUSION**") is fully registered. We respectfully request a non-author proxy for Poster Session BISP-P22 on May 7. All authors are strictly unable to attend due to force majeure:

- Authors 1-5 (Sichuan Agricultural University): Mandatory travel applications were officially rejected by our university due to international security risks and schedule conflicts.
- Authors 6 & 7 (Mengzhu Wang, Hau-sing So): Both were injured in a Feb 27 car accident (Wang suffered a right wrist TFCC injury, and So sustained a thoracic vertebra (T8) compression fracture requiring strict bed rest and immobilization).

Attached are the official rejection letter and medical certificates. We propose the following proxy:

- Name: Zihan Cheng (Confirmation Number: 7GN6C6B8W9M)
- Affiliation: University of Electronic Science and Technology of China
- Email: zihancheng@std.uestc.edu.cn

Cheng is a senior alumnus from our Big Data Application Laboratory. We have thoroughly briefed him on the core methodology to guarantee a high-quality presentation and Q&A session.

Best Regards,

Ke Tan
